

T-1000

T-1000 is a multifunctional carrier designed for various transport applications. Compact, practical, and powerful, it offers extensive adaptability to meet different user needs.

Its lightweight yet robust construction ensures high durability and reliable performance in demanding working conditions. It can be equipped with cable controls or radio remote control operation.

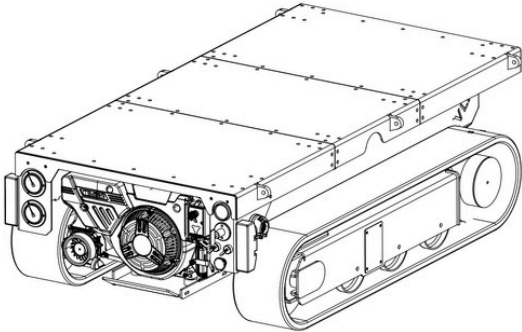

T-1000

T-1000 is a multifunctional carrier. Simple, powerful, and practical, it is designed for transporting tools, equipment, and materials in various working conditions.

The possibilities for adaptation are almost unlimited. Its lightweight design combined with a robust construction makes it durable and easy to operate. The gasoline engine provides more than 4 hours of continuous operation without refueling. The machine can be equipped with cable controls or radio remote control operation.

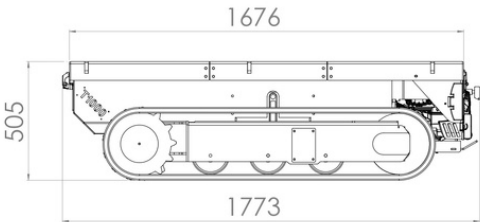

Technical specification

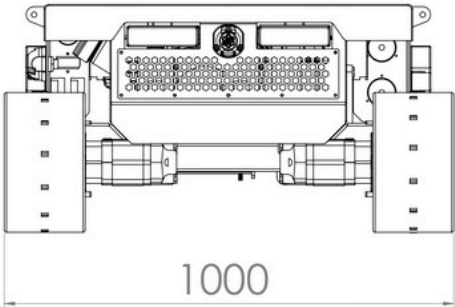

SPECIFICATION	T-1000
Engine type	Vanguard EFI 14 HP
Engine cooling	Air cooling
Hydraulic system	150 bar, dual pump
Hydraulic cooling	Oil cooler with fan
Max carrying capacity	1000 kg
Maximum inclination	20 degrees
Fuel tank capacity	9 liters
Fuel type	Gasoline
Total weight	505 kg
Weight ratio	47%–53%
Electrical system	12V
